

Radiant Research »

From Early to Late, Meeting Your Needs in All Phases

- › 8 clinical pharmacology units within 40 wholly-owned research centers
- › 1,000 experienced research professionals
- › More than 1,000,000 active study participants
- › Over 8,500 completed trials, from Phase I–IV

Phase I and IIa »

Focused on Your Clinical Research Execution Everyday

- › Access to over 400 beds in 8 dedicated units
- › Experience across all types of studies
- › Strategic recruitment, fast enrollment
 - *Effective promotion, dedicated call center, vast database of study participants*
- › Large, ready database of healthy, post-menopausal, elderly and special patient populations
 - *Uniquely integrated with the capability to recruit special patient populations for Phase IIa studies*
- › One contract, one point of contact, for as many units as you need
 - *Efficiently start and manage your research in multiple Radiant Research units*
- › Dedicated regulatory coordinators at each unit
 - *Ensures 72-hour turnaround of regulatory documents*
- › Utilization of a central IRB
 - *Reduces turnaround time to IRB approval*
- › Unparalleled quality assurance
 - *Good, clean data, backed by solid, rigorous standards*

Leading-Edge Science

Advanced Research »

- › Ethnic bridging—*a rich resource for your required demographic*
- › Microdosing—*obtain early PK data accurately and expeditiously*
- › Proof of concept—*effective, efficient, early stage focus*
- › QTc prolongation—*an intensive cardiac safety capability*
- › Radiolabel/ADME—*a unique PET capability and team*

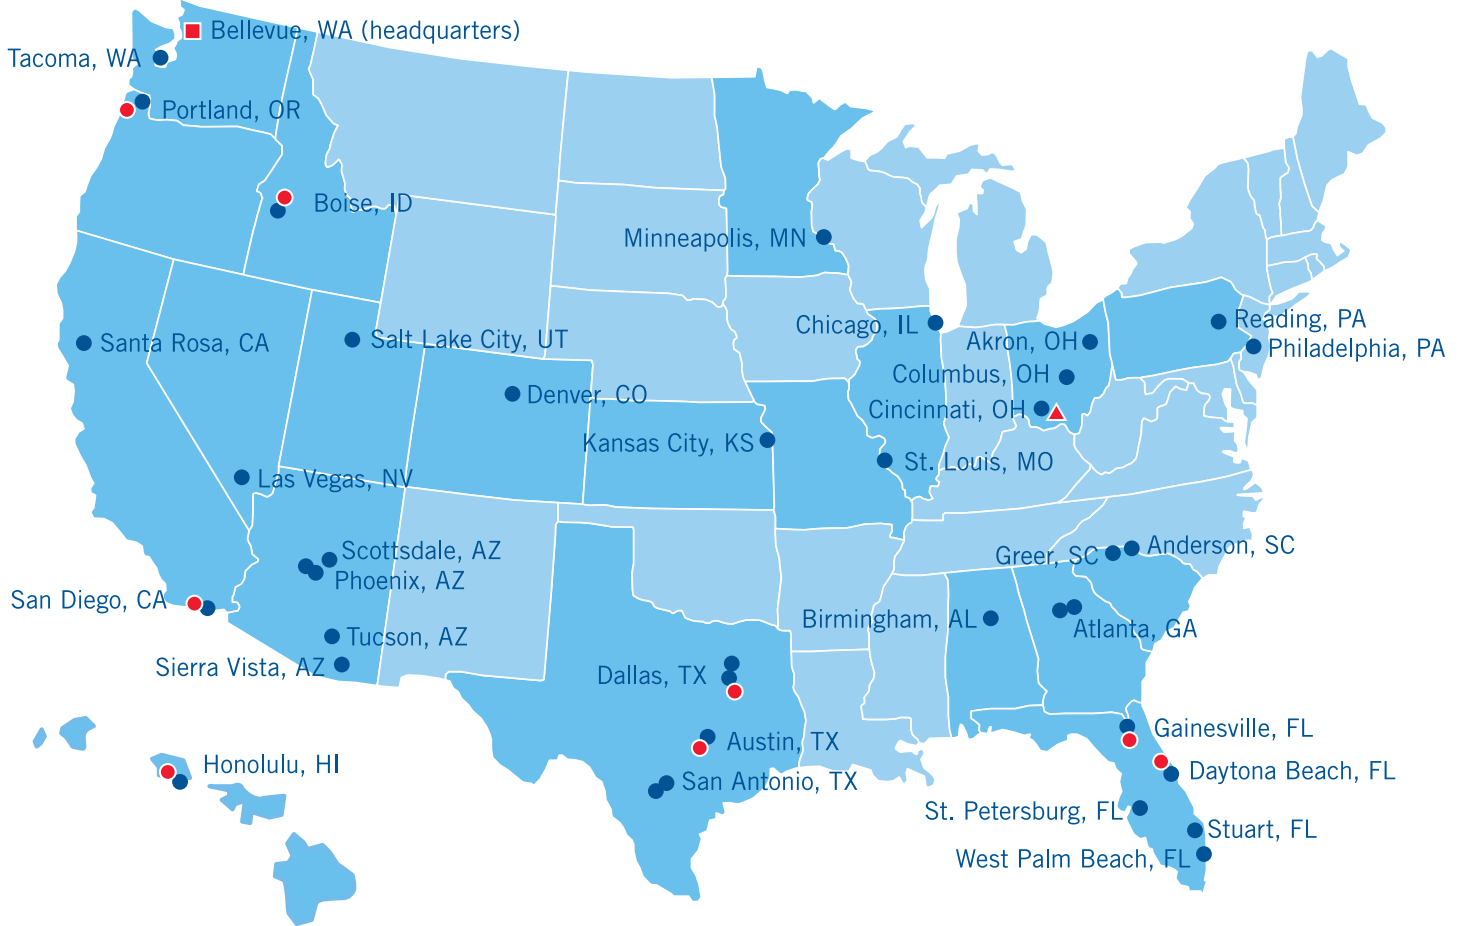

Expertise »

- › Bioequivalence/bioavailability
- › Drug–drug interaction
- › Elderly and post-menopausal
- › First in human
- › Food effect
- › Pharmacokinetic/pharmacodynamic
- › Rising dose tolerance
- › Safety and tolerance
