Radiant Research has provided research services to the pharmaceutical industry since 1990. With Radiant, Pharmaceutical and Biotech companies have a unique source for conducting clinical drug trials. The key to our success has been partnering in the development of research departments within established medical practices. Our research staff is positioned in the clinic, which affords Radiant rapid recruitment of reliable, qualified subjects into clinical trials. Radiant’s trained and caring staff is always finding ways to make visitors feel welcome and appreciated. All clinical staff are NIH certified and, upon meeting credentialing requirements, coordinators are certified to ensure participant safety. The board-certified physicians overseeing the studies provide expert medical attention to study participants during a clinical trial.

Desert Clinical Research has over 900 square feet dedicated research space, including 2 exam rooms, on site laboratory facilities, monitor room with high speed internet, copier, phone, and fax machine. The clinic also offers double locked, temperature controlled drug storage as well as locked, and temperature controlled document storage space.
